

HYDROBLASTING/ HYDROCUTTING

ULTRA-HIGH PRESSURE WATER SERVICES

Amerapex offers industrial hydroblasting and hydrocutting services performed by highly trained and experienced personnel. Minimize downtime during turnarounds by choosing Amerapex to deliver fast, quality and safe solutions to meet your project requirements.

HYDROBLASTING

Hydroblasting involves high-pressure water jet cleaning from 10K to 50K psi for internal and external surfaces.

- Increases efficiencies
- Greater cost-savings
- Faster return to service

APPLICATIONS

Manual & Automated Cleaning Methods

- Tubes
- Vessels
- Ground-level & elevated surfaces
- Pipes
- Tanks

HYDROCUTTING

Hydrocutting is a safe, effective method for cutting through hard surfaces utilizing a mixture of ultra high-pressure water (up to 50K psi) and abrasives with unprecedented power. It's the preferred method to use when there is a chance of an explosive atmosphere.

APPLICATIONS

- Columns
- Concrete
- Regenerator Domes
- Door Sheets
- Tank Floors
- And more!
