

# ROPE ACCESS SOLUTIONS

## AT-HEIGHT ASSET INSPECTION & MAINTENANCE

Industrial Rope Access is primarily used for inspecting, maintaining, or repairing assets that can't be reached by traditional means of access. Amerapex's Rope Access technicians are certified to complete a variety of traditional and advanced non-destructive testing inspection services, as well as maintenance services. We specialize in providing solutions for the most challenging projects. Our team of experienced professionals can help you tackle those challenges, as well as perform them in the most cost-effective and orderly manner.

TIME  
EFFICIENT

HIGHLY  
VERSATILE

INCREASE  
RELIABILITY

## NON-DESTRUCTIVE INSPECTION SERVICES:

- Magnetic Testing (MT)
- Penetrant Testing (PT)
- Radiography Testing (RT)
- Eddy Current Testing (ECT)
- Pulsed Eddy Current (PEC)
- Ultrasonic Thickness (UTT)
- Ultrasonic Shearwave Testing (UTSW)
- Phased Array (UTPA)
- Automated Corrosion Mapping (AUT)
- Time of Flight Diffraction (TOFD)
- Guided Wave (GUL)
- Positive Material Identification (PMI)
- Corrosion Under Insulation (CUI)
- API 510, 570 Visual Inspections
- Real Time Radiography - Open Vision
- Neutron Backscatter - Moisture Detection
- NACE - Coating and Paint Inspection

## MECHANICAL SERVICES:

- Engineering Services
- Piping Repairs/ Replacements
- Valve Servicing/ Replacements
- Isolation & Blinding
- Blasting & Coatings
- Insulation Repairs, Removal & Installation
- Structural Repairs/ Replacements
- Engineered Composite Wraps
